

Danish experiences on accreditation

Expert Meeting on Accreditation
Hans Monrad Graunbøl
Glasgow, the 9th of February 2012

A distinction between ...

Drug/alcohol treatment programs

- 15 programs (High intensity)
- Substitution treatment
- Motivational programs (both prior to and after treatment)

Cognitive/behavioral programs

- Anger management
- Cognitive Skills
- Booster
- VFP
- Nye veje

The development of...

Drug/alcohol treatment programs

- Prior to 1997 = non-existent
- A steady increase 1997-2006
- 2007. Treatment guarantee.

Cognitive/behavioral programs

- 1993-94. Cognitive skills
- 2000-2012. Other programs emerge.

Program courses and completion 2011

Key figures

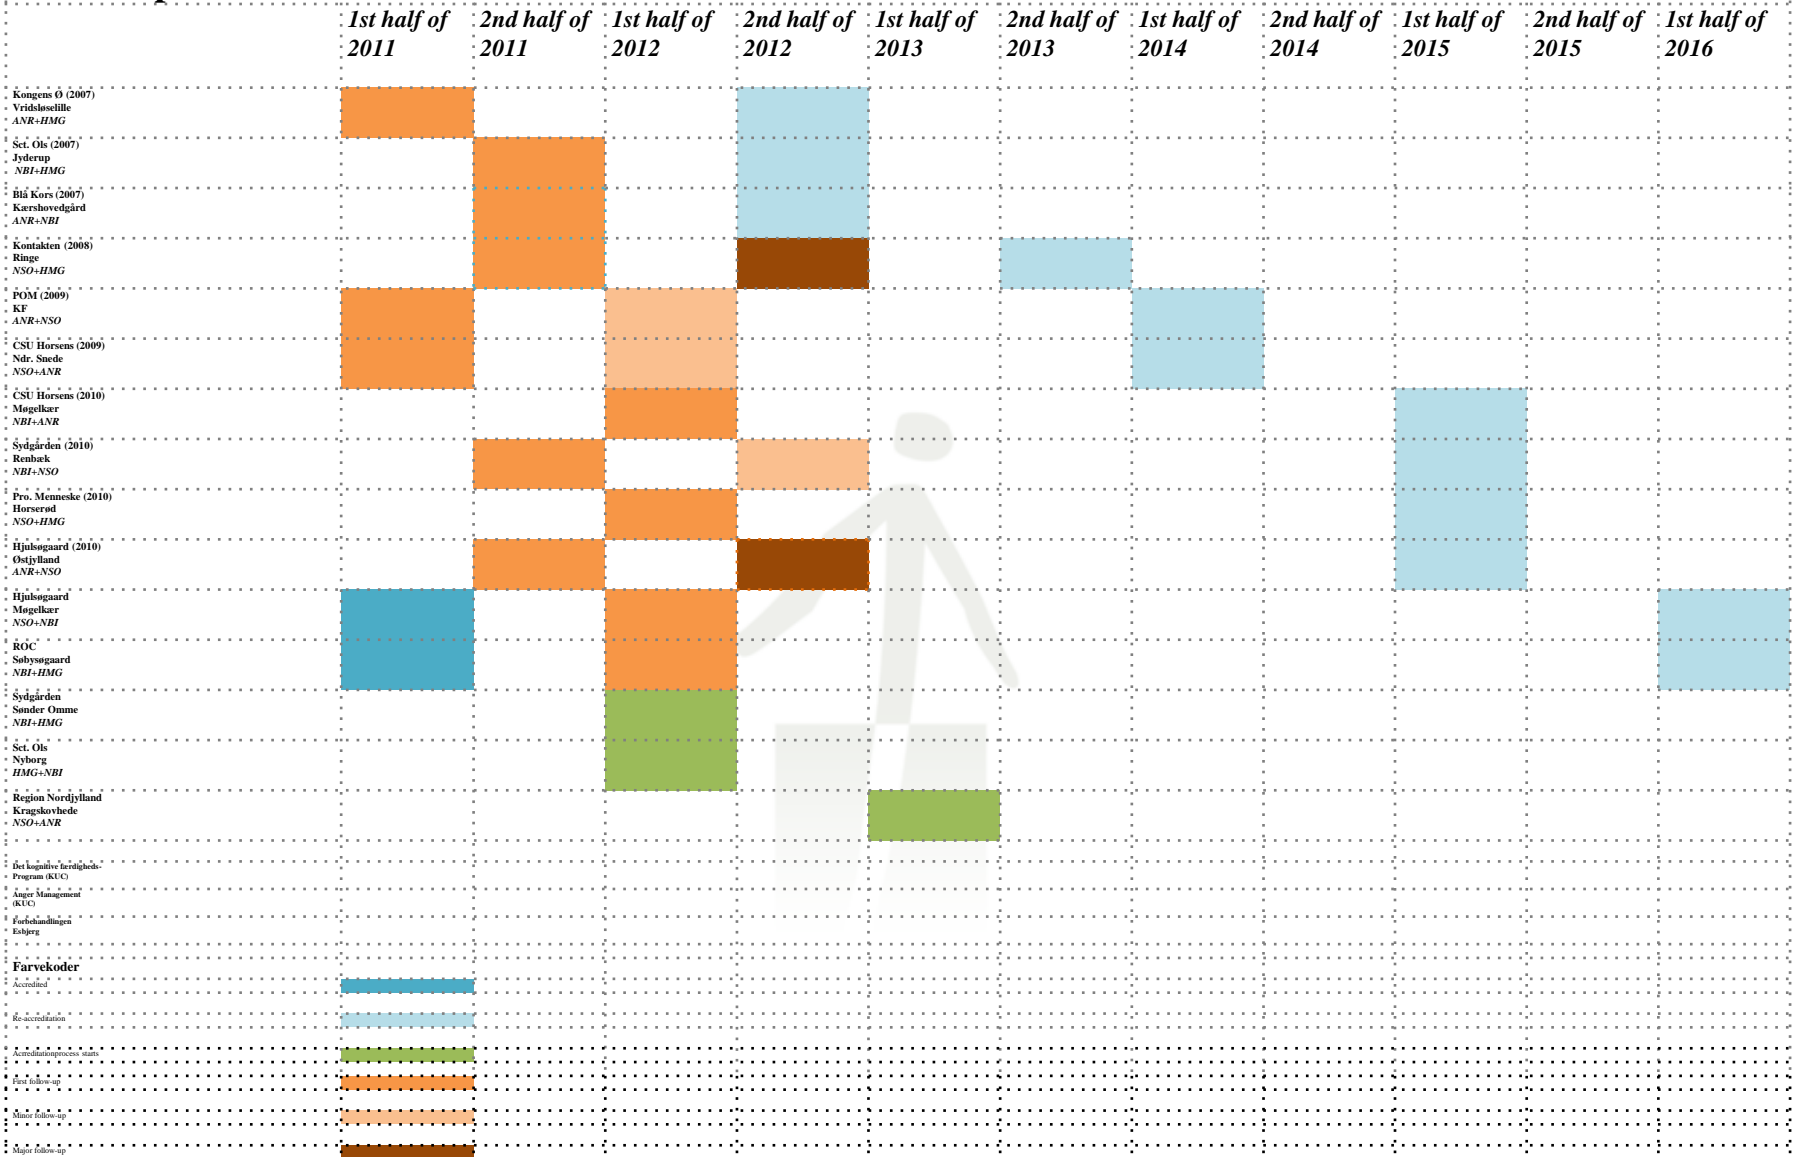

A question of validity and reliability!

■ = accredited programs

* Estimated. 2011 not updated.

	Courses started	Completed/Ongoing (%)
Motivational programs	1509	54 %
Drug and alcohol	731	62 %
Substitution treatment	112	57 %
Cogn. /behav. programs	550*	80 %
	N = 2892	61 %

Follow-up and re-accreditation 2011-2016

Follow-up

- A lot of resources has to be invested
- Difficulties meeting the demands that we put forward.
- However...some improvements on documentation after follow-up
- Sanctions?

Sanctions

- Contracts with private companys = an advantage?
- Dilemma between the legislative demands and organisational demands
- Pragmatic approach!

The future

- No plans of expanding our accreditation efforts
- However, a few high-intensity drug/alcohol programs can be replaced + 3 more programs might be accredited
- Focal point: valid and reliable documentation

Follow-up and re-accreditation 2011-2016
