## Welcome Reception at the Palace of Pedralbes

19:00 - 21:00

The Royal Palace of Pedralbes is a building located in the middle of a large area of landscaped gardens in the district of “Les Corts” in Barcelona.

The Royal Palace of Pedralbes has been declared a National monument of Historical and Artistic Interest. It was begun in 1919 and finished in 1926, when the Palace was formally offered to King Alfonso XIII. Its moment of greatest magnificence came during the Universal Exhibition in Barcelona in 1929. Today the Palace houses the Ceramics Museum and the Museum of Decorative Arts and is the permanent headquarters of the Union for the Mediterranean. The Palace has its origins in ancient farmhouse of Can Feliu, the seventeenth century. The property was acquired in 1862 by Count Eusebi Güell. Together they formed the Finca Güell, covering large areas of 30,000 m2.

The Can Feliu building was remodeled by the architect Joan Martorell i Montells, who built a Caribbean-style small palace, together with a Gothic-style chapel and surrounded by magnificent gardens.

Later the building remodeling was given to Antoni Gaudí, together with the construction of a surrounding perimeter wall and the side entry pavilions. Gaudí also partially designed the gardens surrounding the palace, placing two fountains and a pergola and planted many Mediterranean plants.

The gardens surrounding the Palace were designed by the architect Nicolau Maria Rubio, respecting the original trees and shrubs. Special interest has the fountain formed in wrought iron in the shape of a dragon, designed by the internationally famous Antoni Gaudí between 1870 and 1880.
